

Practicals and Viva in Medical Biochemistry

By Sucheta Dandekar

Elsevier/Paras Medical Books, 2004. Softcover. Condition: New. This book presents a systematic exposition of the Biochemical techniques involved in the Study of Disease process, Diagnosis and prognosis. The Procedures relating to both automatic analyzers and manual analytical methods have been highlighted. The exposition is broadly divided into two parts. The first presents the Methodology and viva voce questions pertaining to the Practicals. Clear cut tables and calculations for the performance of each experiment are included in the practicals. In addition, the book includes a special chapter on transportation, sample handling and Quality Control which highlights various intricacies in clinical biochemistry. With all these features, the book would be extremely valuable for undergraduate students of both Medicine and dentistry. Students of pharmacy as well as occupational and Physiotherapy would also find it useful. Printed Pages: 240.
