

Workplace Violence Prevention Strategies and Research Needs

By Centers for Disease Control and Prevention

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 50 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. Since the 1980s, violence has been recognized as a leading cause of occupational mortality and morbidity. On average, 1.7 million workers are injured each year, and more than 800 die as a result of workplace violence (WPV). These tragic deaths and injuries stress the need for a proactive and collaborative WPV prevention effort at the national level. As part of its WPV Research and Prevention Initiative during 2003, the National Institute for Occupational Safety and Health (NIOSH) convened a series of stakeholder meetings that focused on various types of WPV and the industries and occupations at risk. For example, separate meetings addressed domestic violence in the workplace, violence in health care facilities, violence in retail settings, and violence against law enforcement and security professionals. The purpose of these meetings was to bring together subject matter experts from business, academia, government, and labor organizations to discuss current progress, research gaps, and collaborative efforts in addressing WPV. One of the recurring discussion points that emerged from the meetings was the need for a national conference on WPV prevention. In...
