InterVarsity Press July 2002, 2002. Paper Back. Condition: New. "Intelligent design is three things: a scientific research program that investigates the effects of intelligent causes; an intellectual movement that challenges Darwinism and its naturalistic legacy; and a way of understanding divine action. Intelligent design therefore intersects science and theology" (from the preface). Phillip Johnson's 1993 *Darwin on Trial* criticized Darwinian theory as massively flawed and philosophically rather than scientifically driven; Michael Behe's 1996 *Darwin's Black Box* put forward the "irreducible complexity" of molecular biology as another major deficiency in conventional evolutionary theory; now William Dembski contributes his own methodology of intelligent design as an inference that must be extended from sciences where it is commonly used -- information theory, cryptography, forensics -- to molecular biology and cosmology. He has become one of the major theorists in a coalescing movement of scientists and philosophers who refuse to be swept under the rug of the scientific community for questioning received wisdom, who believe that divine action can no longer be contained in a hermetically sealed theological container, since it seems to be the most reasonable hermeneutical key to the physical reality we inhabit.
