Brand New Book ***** Print on Demand *****.UFOs have been observed since antiquity and continue to be spotted to this day. While many can be explained under a range of natural and man-made phenomena such as planets, stars, aircraft and weather balloons, a small hard-core percentage of UFOs providing considerable details of a strange symmetrical metallic and glowing object flying in the air has continued to mystify the scientists. Naturally one must ask, What are these UFOs? In 1969, a US government-sponsored study by the University of Colorado headed by Dr Edward U. Condon claimed that UFO reports represented nothing new to science and, therefore, will neither advance our scientific knowledge nor present any new technology. With marks left on the ground, electromagnetic disruptions to man-made electrical systems, and witnesses who have suffered from radiation poisoning, burns, and other medical conditions in the presence of these objects, a growing number of the hard-core reports are revealing some kind of a real and physical electromagnetic phenomenon. Are these UFOs ball lightning? Are they a secret man-made electromagnetic experiment being employed by someone in the world (perhaps the U.S. Air Force)? Or are they alien? Now a new concise and simple scientific analysis of the mystery will blow away the 1969 conclusion thanks to an amazing new discovery that will shock some readers. This book reveals for the first time the answer to the genuine UFO reports.
