The new book is thoroughly updated, and includes all-new chapters such as: *Farm-Generated Fertility* how to meet your soil-fertility needs from the resources of your own land, even if manure is not available. *The Moveable Feast* how to construct home-garden and commercial-scale greenhouses that can be easily moved to benefit plants and avoid insect and disease build-up. *The Winter Garden* how to plant, harvest, and sell hardy salad crops all winter long from unheated or minimally heated greenhouses. *Pest* how to find plant-positive rather than pest-negative solutions by growing healthy, naturally resistant plants. *The Information Resource* how and where to learn what you need to know to grow delicious organic vegetables, no matter where you live.
