

Water Resources Assessment of the Toklat Basin in the Vicinity of the Stampede Trail Alignment: Denali National Park and Preserve (Paperback)

By National Park Service

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. A massive, state-proposed, road/railroad building project will, if constructed, bisect the Toklat Basin area in and adjacent to Denali National Park and Preserve, along one of three proposed routes. If construction occurs, the road and its associated gravel pits will affect hundreds of pristine waterbodies, aquatic habitat, and wetlands. At particular risk are spring-fed, gravel-bed streams, which act as salmon spawning, rearing, and overwintering areas. A basic and severe lack of knowledge of the water resources along this corridor seriously threatens the National Park Service's (NPS's) ability to analyze, manage, and protect this area and subsequently mitigate impacts if this road construction occurs. In response, a comprehensive study was initiated in 2004 to determine baseline water quality and physical hydrology information for five major rivers and streams in the Toklat Basin—the Sushana River, the East Fork River, Wigand Creek, the Toklat River, and the Clearwater Fork River.

Reviews

Excellent electronic book and valuable one. Better than never, though I am quite late in starting reading this one. I am very easily can get a delight of studying a written book.
